

QDialog

```
classDiagram
    class QDialog
    class NewBrewWindow {
        NewBrewWindow
    }
    NewBrewWindow --|> QDialog
```

The diagram illustrates a class inheritance relationship. At the top, a white rectangular box with a thin gray border contains the text 'QDialog'. Below it, a blue arrow points upwards towards the 'QDialog' box. The arrow originates from the center of a wider, gray rectangular box at the bottom. This bottom box has a thick black border and contains the text 'NewBrewWindow.NewBrewWindow'.

NewBrewWindow.NewBrewWindow
